

CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH (COSHH)

Course Number
VEL0217

Time Required
125 minutes

Assessment
Formal (multiple choice)

Approvals
IIRSM

This course covers what you need to know about the Control of Substances Hazardous to Health (COSHH). It's aimed at anyone who is exposed to Substances Hazardous to Health at work, as well as line managers with responsibility for such people.

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

So what do we mean by 'Substances Hazardous to Health'?

In legal terms, these are substances that are classified as "very toxic, toxic, harmful, corrosive or Irritant" under the Classification, Labelling and Packaging Regulation (CLP). This was a new regulation that came into force in January 2009 dovetailing with a set of regulations called REACH. REACH is a European Union regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals, which came into force on 1st June 2007. One of the main aims of REACH is to provide a high level of protection for human health and the environment from the use of chemicals.

Suitable for:
Care, Education
and Commercial

Modules:

- Introducing COSHH
- Different Types of Hazard
- Different Types of Exposure
- Regulations and Approved Labelling
- Assessing COSHH Risks
- The Risk Assessment in Practice
- Exposure Control
- Staying in Control
- Training and Emergency Planning
- Course Summary
