

CYBER SECURITY

Course Number

VEL0242

Time Required

25 minutes

Assessment

Formal (multiple choice)

Approvals

IIRSM, CPD

Employees, managers and directors should all have a good understanding of the threat posed by cyber-attacks and the importance of guarding against data breaches.

This short online Cyber Security E-Learning course will explain why cyber attacks and data breaches happen and provide practical advice on how to set up effective defences.

First, the Cyber Security online course will identify potential 'cyber threat actors' who initiate cybercrime, along with looking at the main motivations behind cyber-attacks on individuals and organisations.

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

On a more practical level, you'll learn how to recognise and deal effectively with phishing attempts. The online Cyber Security course will highlight the importance of keeping passwords secure and cover security for devices, such as smartphones, laptops, tablets or desktop computers.

You'll learn how to report a suspected cyber attack, and what to do if you genuinely make a mistake.

Finally, the Cyber Security E-Learning course will underline the importance of cooperation and show how working closely together helps overcome a wide range of cybersecurity issues.

Suitable for:

Care, Education
and Commercial

Modules:

- Cyber Security – An Overview
- Combating Cyber Attacks
