

ASBESTOS AWARENESS

Course Number

S1

Validity

3 Years

Duration

3 Hours

Assessment

-

This Asbestos Awareness course provides delegates with the essential knowledge to identify the risks associated with asbestos exposure and understand how to work safely in environments where asbestos may be present. The course explores the types of asbestos, typical locations it may be found, associated health risks, and the legal responsibilities of employers and employees. Emphasis is placed on safe working practices, control measures, and the importance of risk assessment. This course is suitable for maintenance staff, contractors, and anyone who may encounter asbestos in the workplace.

Introduction

- Introduction and course overview
