

INTRODUCTION TO AI PROMPT

Course Number	Time Required	Assessment	Approvals
VEL0438	45 minutes	Formal (multiple choice)	-

This short E-Learning course provides an introduction to AI prompts and prompt engineering, covering its purpose and value across various sectors. It traces the evolution of AI from the mid-twentieth century to the present day, before introducing Natural Language Processing and its key concepts. The course then covers the four key components of effective AI prompts, what to avoid when structuring them, and examples of both good and bad prompts. Finally, it moves into prompt optimisation — exploring why refining prompts matters and the techniques you can use to do it.

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

The online Introduction to AI Prompts E-Learning course is aimed at all individuals who will be encountering AI in both work and personal projects. The course aims to help individuals to use AI effectively and efficiently, understanding how prompts can help make AI an effective tool.

Suitable for:

Care, Education
and Commercial

Modules:

- Introduction to AI prompt engineering
- Crafting effective AI prompts
- Optimising and refining AI prompts
- Evaluating AI prompt performance
-
